### **Walk-in closet Ubik, design CR&S Poliform, 2003**

A walk-in closet as an architectural solution for every room. Ubik is a system that interprets a storage project according to the maximum individuality thanks to modular solutions and aesthetical definition. A proposal of the highest quality able to give shape to the most different lifestyles.

### **The Ubik system**

The Ubik system offers an evolved storage organization, with a series of units and accessories dedicated to specific functions: trays, drawers with wooden or glass front, pull-out shoe racks, trousers hangers, shirts hangers. A walk-in closet in which functionality and personal style coincide.

### **Finishing:**

The wall panels and equipments of the Ubik system are available in 4 different melamine finishes: oak , wenge, walnut c. and white pine; washable, easy to maintain, humidity and scratches resistant : a finishing thought to guarantee strength and complete reliability over time. The wall panels are also available in glossy glass 9 colours and in white and fumè mirror.

### Dimensions:

The wall panels can be substituted by vertical panels with brackets that are fixed to the wall and completed with the equipment foreseen for the system.

The panels are available in 3 heights and 3 widths; thickness mm 60 - 2 1/4"  
To obtain the total width, add to the total panels mm 72 - 2 3/4" (end frames), and mm 4 - 1/4" between each panel.

Top, shelves and bases are available for the depth mm 406 - 16"

### Equipment

Ubik system consists of wall panels, completed and equipped with a wide range of accessories: shelves, clothes racks, pull out trouser holder, floor containers, hanging cabinets and chest of drawers on castors. The possibility of a free positioning in height of the equipment confirms the flexibility of the system.
